pCR KanR f

info:

utility:

- This gene inactivates the aminoglycoside antibiotic, aka Kanamycin
- It was captured after PCR into the shuttle vector pCRscriptCam (Stratagene)
- Modified to have a 5’ Sac I site and a 3’ Hind III site

features:

KanR: 795-1610
pCam: 2893-2938
CamR: 3013-3564
T7 sequencing primer region: 625-646
T3 sequencing primer region: 1679-1659
