pCR oriHC r

info:

utility:

• This is the high copy origin called colE1 or pUC origin.
• It was captured after PCR into the shuttle vector pCRscriptCam (Stratagene)
• Modified to have a 5’ Hind III site and a 3’ Xhol site

features:

‘ori: 1407-789
lacZ’: 1495-1408
CamR: 2804-3315
T7 sequencing primer region: 625-646
T3 sequencing primer region: 1470-1450
