pCR oriLC r

info:

utility:

- This is the high copy origin called colE1 or pUC origin.
- It was captured after PCR into the shuttle vector pCRscriptCam (Stratagene)
- Modified to have a 5’ Bgl II site and a 3’ Xhol site

features:

ori: 785-735
pCam: 2062-2107
CamR: 2182-2733
T7 sequencing primer region: 625-646
T3 sequencing primer region: 848-828
